Dear Katherine

FIORDLAND EXPERIENCE—ALTERNATIVE ALIGNMENT

Thank you for your recent correspondence regarding an alternative alignment for part of the monorail section of the Fiordland Experience project.

The alternative alignment, shown as "Proposed Route C" on Drawing Number 94475 MRO3, avoids the Dunton Wetland, and in part goes onto the privately owned Te Anau Downs Station. This alignment moves the monorail away from some particularly sensitive areas.

We have reviewed our assessment of noise effects report (23rd June 2004). This report examines effects of the monorail in a generic manner which means that our conclusions are unaffected by this alternative alignment. As far as we can tell, this change does not introduce any new noise issues.

Yours sincerely

MARSHALL DAY ACOUSTICS

Stuart Camp
